Chemical Number/Name: 128825/bifenthrin
Generic DCI, ID# GDCI-128825-1114

Residential Pyrethroid Use Information Data Call-In Response

FMC Corporation is submitting our 90-day response to the residential pyrethroid use information Data Call-In.

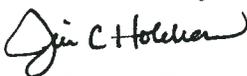

FMC has entered into an agreement with other pyrethroid registrants to form the Residential Exposure Joint Venture (REJV), which will be jointly developing data required under the DCI.

Enclosed, please find the following documents:

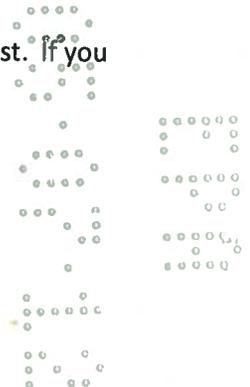

1. A letter from Susan Little of CSPA confirming FMC's membership in the REJV
2. Data Call-In Response Forms for each active

We trust that the enclosed information is acceptable for the Agency to process this request. If you have any questions, please call.

Sincerely,

Jill C. Holihan
Product Registration and Regulatory Affairs Manager
(215) 299-6436

Ewing, NJ 8628

Re: REJV-Residential Exposure EPA Company # 74888

Dear Mr. Cummings,

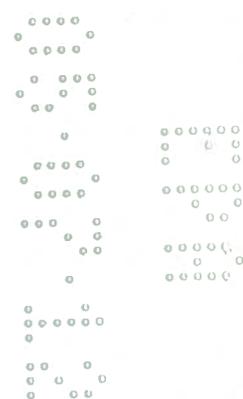

This letter is written to confirm that FMC Corporation is a member in good standing of the Residential Exposure /Joint Venture (REJV) and has the right to rely on and cite all data developed by the REJV.

Data developed by the REJV are proprietary to the membership of the REJV and cannot be cited and/ or relied on without express written consent.

Please do not hesitate to contact me by phone 202-833-7315 or email at slittle@cspa.org if you have questions regarding this matter.

Sincerely,

Susan E. Little
Executive Director, PIR Program
For the Residential Exposure Joint Venture

FOOTNOTES AND KEY DEFINITIONS FOR GUIDELINE REQUIREMENTS

Case # and Name: 2510 - Permethrin

DCI Number: GDCI-109701-1113

Key: Residue of Concern = Residue of Concern; TEP = Typical End Use Product [TEP]; TGAI = Technical Grade Active Ingredient [TGAI]; TGAI/PAIRA = Technical Grade of the Active Ingredient or Pure Active Ingredient, Radio Labelled; TGAI, TEP = Technical Grade of the Active Ingredient or Technical End-Use Product; TGAI/PAI = Technical Grade Active Ingredient, Pure Active Ingredient

Use Categories Key:

A - Terrestrial food crop

B - Terrestrial feed crop

C - Terrestrial nonfood crop

H - Greenhouse food crop

I - Greenhouse nonfood crop

K - Residential

M - Indoor nonfood use

O - Residential Indoor use

Q - Residential outdoor use

R - Agricultural premises and equipment

S - Food handling/storage establishments premises and equipment

T - Commercial, institutional and industrial premises and equipment

U - Residential Use Conventional Chemical

Footnotes: The following footnotes are referenced in column two (5. Study Title) of the Requirements Status and Registrant's Response form. These footnotes apply in addition to any test notes included in 40 CFR Part 158 with respect to the particular data requirement.

- 1 Product Use Information - The Agency is requiring residential pyrethroid use information to address probabilistic human health risk assessment for the pyrethroid chemical class and inform exposure assessment for estimating ecological risks. In the past, the Residential Exposure Joint Venture (REJV) developed a residential product use survey in the late 1990's as a vehicle to address FIFRA re-registration and FFDCA tolerance reassessment. The type of use information the Agency is now requiring must include a number of residential use parameters for pyrethroid pesticides, such as: identification of relevant target pest(s) and location of treatment (indoor/outdoor) per active ingredient and formulation type, the typical values (and ranges) of residential pyrethroid application rates (per active ingredient and product formulation type), the specific use patterns in which pyrethroids are applied, the types of application equipment used, co-occurrence data (e.g., application of same active ingredient to address separate pest issues by a resident or Pest Control Operator). Time-based parameters required to be included are the timing of residential pyrethroid applications (i.e., the typical values (and ranges) of re-treatment intervals for given application types) per day and season, and exposure time per application activity for the active ingredient and formulation type. Additionally, the geographic distribution of pyrethroid pesticide usage is required to be reflected in residential product use profile database.
- 2 Registrants must submit a protocol outlining the design and conduct of the study and receive Agency approval. A pilot or focus group is required to ensure the data collection feasibility for the final survey design.
